## VINEYARD

Vineyards are planted in well-drained soils under a dry continental climate with high sunlight exposure and strong temperature contrasts between day and night. These conditions promote healthy ripening, good acidity retention, and expressive, aromatic grape profiles.

### VITICULTURE

Yields are controlled to enhance grape quality, and harvesting is timed to preserve freshness, acidity, and aromatic intensity. Sustainable practices ensure balanced, healthy fruit ideal for fresh, expressive wines.

### **VINIFICATION**

Fermented in stainless steel tanks at controlled temperatures to preserve aromatic freshness and varietal character. This method highlights the wine's vibrant fruit profile and clean, youthful expression
