RESIDUAL SUGAR	0.5g/l
SKU	E0846124

VINEYARD

Vineyards located 5km from the Mediterranean sea. This has a massive effect on the climate of the area: it does not freeze in winter, and in the hot season the temperature hardly rises above 31ºC as the Mediterranean breez blows to cool down the climate.Very stable temperature along all the year long. Very poor soils with the mother stone at only 1 mt depth. Clay and sandy. Small plots belonging to different neighbours that have different Mediterranean crops: a lot of biodiversity

VINIFICATION

Traditional vinification using yeast from the vineyards (we start the fermentation of a selected plot and we use it to start the fermentation of the rest of the wines). Low addition of SO2. We use the latest téchnology to have a better performance of traditional téchniques.
